MLX73290-A 300 to 930MHz Transceiver with Integrated 3D LF receiver
Highly Integrated RF IC from Melexis Encourages Proliferation of Passive Entry & Low-Power Tracking Systems

ATs' power brick heat sinks are specifically designed to cool eighth-, quarter-, half-, and full-brick size DC-DC converters
Brick DC-DC power converters are an essential part of PCB design. Their performance requires a stable temperature for optimum performance. ATs has produced a broad array of high performance heat sinks, based off of the patented maxiFLOW™ design, to effectively cool DC/DC power converters and power modules deployed in a host of electronics applications.

Hirose offer their FX23 series connectors designed for high-speed applications
Hirose's FX23 series hybrid power and signal board-to-board connector features a high-speed transmission capability up to 8 Gbps and a highly reliable floating contact mechanism that simplifies assembly. The FX23 series is designed for a wide range of high-speed applications including medical devices, office imaging equipment, measurement equipment, industrial computer systems, automotive navigation and audio systems, broadcast equipment, base station transceivers, industrial machinery, and more.

HMC1099 - 10 Watt GaN Power Amplifier, 0.01 - 1.1 GHz
The HMC1099 is ideal for pulsed or continuous wave (CW) applications, such as wireless infrastructure, radars, public mobile radios, and general-purpose amplification.

LED Engin's LZ4 multi-color high-current RGBW emitter
LED Engin's 40 W LZ4 RGBW power emitter produces a full spectrum of brilliant colors with the highest flux density by allowing each die to be driven at up to 3.0 A. Through its compact 2.15 mm x 2.15 mm light emitting area, it delivers more than double the light, doubling the punch from the same fixture utilizing previous generation 4-die RGBW emitters.

Multifunctional MASTER time relay with 2-digit LED display
The new MASTER time relay from POLLIN is distinguished by the simplicity and accuracy of settings, as well as complex information about the programming and the status. MASTER relay is programmed in six seconds with two buttons. Readability of information thanks to a large, 2-digit LED display.

WWW.COMPONENTS.ONLINE

alias www.electrocomponents.online , www.electroniccomponents.online

- English language information portal focusing on the components used in all technical fields. The content are information about new components, new products, spare parts, ...
- In addition we will give you information about manufacturers and suppliers of these components, info about trade fairs, exhibitions, seminars and social events, measurement, logistics, supply, ...
- Newsletter - www.components.online/newsletter
- Facebook - www.components.online/facebook

WWW.COMPONENTS.ONLINE

Our next projects :

Information portals focused on consumer electronics
WWW.ELEKTRONIKA.CZ (www.elektronika.online) - Czech/Slovak language version
WWW.ELECTRONICA.ONLINE - English language version
WWW.ELEKTRONIKA.ONLINE/PL - Polish language version
WWW.ELEKTRONIKA.ONLINE/RU - Russian language version

Family of information portals for tech-able readers
WWW.ELECTRONIC-INFO.EU - English language version
WWW.ELEKTRONIK-INFO.CZ - Czech/Slovak language version
WWW.ELEKTRONIK-INFO.PL - Polish language version
WWW.ELEKTRONIK-INFO.RU - Russian language version

The main content are information about new electronic components, measurement techniques, technologies, modules, product, solar technology, electromobility, regulation and management of production and buildings, ...
